

PREETAM SHARMA

Node.js developer

ABOUT ME

Node.js Backend Developer specialized in building scalable server-side architectures, secure REST APIs, and high-performance database-driven applications using Node.js, Express.js, and MongoDB. Skilled in designing clean backend structures, implementing robust authentication systems, and optimizing API performance with efficient data models, caching, and query tuning. Strong focus on writing maintainable code, ensuring system reliability, and delivering smooth, secure backend functionality for web and mobile platforms.

EDUCATION

BACHELOR OF TECHNOLOGY

CS ENGINEERING

SRM UNIVERSITY, DELHI NCR

WORK EXPERIENCE

2025
may-
NOW

FZEETECHZ PVT LTD

Node.js Developer

- Designed and developed scalable RESTful APIs using Node.js, Express, and MongoDB with schema-driven models, modular architecture, and clean code patterns.
- Implemented secure authentication & authorization including JWT-based login, refresh tokens, role-based access control (RBAC), and strict input validation layers.
- Optimized database performance through indexing strategies, aggregation pipelines, efficient query structuring, pagination, and caching for high-traffic applications.
- Integrated third-party services such as payment gateways, SMS/Email providers, KYC services, and analytics tools, ensuring robust error handling and logging.
- Implemented secure file upload flows, storage management, and media handling with validation, size restrictions, and sanitization for safe processing.
- Developed real-time features using WebSockets/Socket.io for notifications, event updates, messaging modules, and system-wide live interactions.

SKILL

- Node.js
- Express.js
- MongoDB
- JavaScript(ES6+)
- REST APIs
- Git & GitHub
- Github copilot
- Tailwind CSS
- HTML
- CSS
- SASS Firebase
- Context API Socket.io
- Linux / Ubuntu Server
- Nginx Deployment
- Postman / API Testing
- Hostinger
- GoDaddy
- Domain Management

LANGUAGE

- English
- Hindi

PROJECTS

■ APNASHATHI – MATRIMONIAL PLATFORM

A SCALABLE MATRIMONIAL PLATFORM WITH REAL-TIME FEATURES, SECURE USER WORKFLOWS, AND COMPLETE BACKEND ARCHITECTURE. IN APNASHATHI

KEY CONTRIBUTIONS:

- Developed the complete backend using Node.js (Express) with secure and scalable REST API architecture.
- Designed MongoDB data models, indexing strategies, aggregations, and optimized database performance.
- Implemented real-time chat and communication using WebSocket / Socket.io.
- Added JWT authentication, role-based access control (RBAC), and robust request validation.
- Built secure media upload handling, file processing flows, and storage logic.
- Integrated external services including Email providers, payment modules, and analytics tracking.
- Managed deployment, environment variables, and server configuration (Nginx, PM2, VPS).

TECH STACK

Node.js, MongoDB, Agora Api, WebSocket, Socket.io, Payment Gateway Integrations

■ JUPITER TOKEN – DIGITAL WALLET & TRANSACTION MANAGEMENT SYSTEM

A secure token-based financial system designed for wallet operations, transaction processing, withdrawals, and admin-controlled approvals.

KEY CONTRIBUTIONS:

- Developed complete backend architecture using Node.js, Express.js, and MongoDB.
- Implemented secure wallet system with credit, debit, transfers, and withdrawal requests.
- Added transaction verification, fraud checks, and detailed ledger logging.
- Created admin approval workflows for withdrawals, KYC checks, and financial controls.
- Built user-side income tracking, statements, transaction summaries, and history APIs.
- Added cron-based updates for daily calculations and automated financial processes..
- OxaPay payment gateway implementation

TECH STACK

Node.js, Express.js, MongoDB, Cron Jobs, Gateway

■ Autonix – Team Analytics Platform

A structured user-growth and reward-distribution platform built with secure backend architecture, automated reward logic, and real-time team insights.

KEY CONTRIBUTIONS:

- Referral onboarding
- Automated reward engine
- Level-based performance logic
- Wallet & transaction tracking

TECH STACK

Node.js, Express.js, MongoDB, Mongoose, JWT Auth, Cron Jobs

■ METAFACE – GROWTH PERFORMANCE SYSTEM

A comprehensive token-driven engagement platform designed for secure wallet operations, user activity tracking, reward automation, and seamless financial workflows.

KEY CONTRIBUTIONS:

- Developed a secure token-based platform with wallet operations, transaction history, and conversion logic, ensuring safe and consistent financial workflows.
- Implemented user identity verification, KYC processing, and role-based authentication, creating a compliant and secure onboarding system.
- Integrated automated reward distribution, activity tracking, and performance-based token logic to enhance user engagement and system reliability.

TECH STACK

Node.js, Express.js, MongoDB, Mongoose, JWT Auth, Cron Jobs

■ CERTZILLA.AI – JOB CREATION & SCHEDULING PLATFORM

A WORKFLOW AUTOMATION SYSTEM BUILT TO MANAGE JOB CREATION, ASSIGNMENT, AND EXECUTION WITH COMPLETE ROLE-BASED TRACKING.

KEY CONTRIBUTIONS:

- Job creation & scheduling
- Role-based workflow (Admin → Manager → Operator)
- Real-time job tracking & status updates
- Notifications, activity logs & coordination
- Secure APIs with validation and RBAC

TECH STACK

Node.js, MongoDB, Agora SDK, WebSocket, Socket.io, Cron Jobs

VENUSXVS – TOKEN OPERATIONS & USER ACTIVITY MANAGEMENT SYSTEM

A platform for managing token workflows, user activity tracking, automated reward logic, and real-time transaction monitoring with complete wallet oversight.

KEY CONTRIBUTIONS:

- Built a structured backend system to manage token transactions, user activity flows, and automated reward processes with complete audit tracking.
- Designed multi-layer user roles with admin-controlled token operations, approvals, and financial oversight, ensuring secure and compliant workflows.
- Implemented real-time monitoring for token movements, user performance metrics, rank progression, and wallet updates across the platform.
- Added a centralized admin dashboard logic for tracking transactions, activity summaries, reward cycles, and overall system health, optimized for high-volume operations.

TECH STACK

MongoDB, Express.js, Node.js, mongoose, Cron Jobs

ALSAKHAA – WORKFLOW & CERTIFICATE MANAGEMENT PLATFORM

A workflow automation system for handling certificate creation, project assignments, and multi-role operational processes. Built with separate panels for Admin, Project Manager, Contractor, Sub-Contractor, and Customer, ensuring smooth coordination across all workflow stages.

KEY CONTRIBUTIONS:

- Multi-role workflow system with Admin, Project Manager, Contractor, Sub-Contractor, and Customer modules for smooth project handling.
- Job creation, assignment, verification, and approval pipeline for certificate processing and project tasks.
- Secure document handling with certificate generation, file uploads, audit logs, and status tracking across all levels.
- Email notifications, role-based alerts, and automated workflow updates for streamlined coordination.

TECH STACK

Node.js, Express.js, MongoDB, Mongoose, JWT Authentication, Role-Based Access Control (RBAC), Cron Jobs

DHANTAG – FINANCE MANAGEMENT & UTILITY PAYMENT DASHBOARD

A FINANCE AND UTILITY-MANAGEMENT DASHBOARD FOR DIGITAL PAYMENTS, WALLET HANDLING, USER ONBOARDING, AND TEAM TRACKING. IT SUPPORTS SECURE TRANSACTIONS, RECHARGE SERVICES, INCOME MONITORING, AND REFERRAL-BASED EARNINGS THROUGH A CLEAN, STRUCTURED INTERFACE.

KEY CONTRIBUTIONS:

1. Wallet & Finance Management

- Secure wallet operations with Add Funds and Withdraw options
- Real-time balance, total income, and daily income overview
- Complete deposit and withdrawal history with status tracking

2. Digital Payments & Utility Services

- Mobile, electricity, gas, water, broadband, and DTH payments
- Fast recharge workflow with saved history
- Unified section to view and manage all bill payments

3. User Account & KYC System

- Profile details with active account status
- Full KYC verification module
- Stepwise account pendency and agreement confirmations

4. Order & Product Workflow

- New order creation and submission
- Tracking for pending, approved, and rejected orders
- Product listing and purchase management

5. Team & Genealogy Management

- Sales Team, Direct Team, and Downline structure
- Multi-level team visualization for network growth
- Performance and referral tracking

6. Referral Earnings System

- Two unique referral links with commission up to 15%
- Bonus earnings and sharing options
- Referral-based income tracking

TECH STACK

Node.js, Express.js, MongoDB, PhonePe Payments, Push Notifications, JWT Auth
